Public Avalanche Information
Avalanche Bulletin - Banff, Yoho, and Kootenay National Parks - Sat Oct 24, 2020

Issued: Tue Oct 20, 2020 17:00 **Valid Until:** further notice

***"There is enough snow to ski in some smooth alpine and treeline features, but getting there will be rough. If you're keen to get out, give yourself extra time and choose an area with easy access to higher elevations."* [IJ]**

▼ Public Avalanche Forecast

Early Season Conditions: Tuesday

Insufficient observations exist to reliably rate the avalanche danger. Expect shallow snow cover with thinly buried rocks and trees just beneath the surface. Avalanche danger often concentrates in gullies and other deposition areas, where windslabs may bond poorly to a weak underlying base. Deeper snow usually exists at higher elevations.
