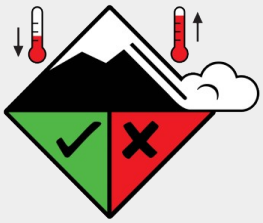
Public Avalanche Information
Avalanche Bulletin - Banff, Yoho, and Kootenay National Parks - Sun Aug 01, 2021

Issued: Sun May 09, 2021 17:00 **Valid Until:** further notice

“Although AVALANCHE HAZARD REMAINS in the mountains, we are no longer producing regular avalanche bulletins. Use the links provided to create your own avalanche hazard forecast. The MCR Regional Summary is a good starting point for recent conditions.” [IJ]

▼ Public Avalanche Forecast

Spring Conditions: Sunday



The avalanche danger is variable and can range from Low to High. Travelling early in the day is recommended, as conditions can change rapidly in short periods of time due to daytime warming. Pay careful attention to the integrity of surface crusts formed overnight and rising air temperatures during the day. Dry slab avalanche danger may also exist during spring snow storms.
