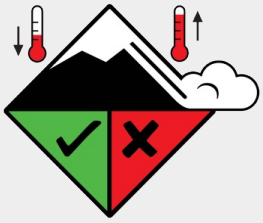
Public Avalanche Information
Avalanche Bulletin - Waterton Lakes National Park - Wed Jun 23, 2021

Issued: Fri May 21, 2021 11:59 **Valid Until:** Mon May 24, 2021 17:00

"Although AVALANCHE HAZARD REMAINS in the mountains, we are no longer producing regular avalanche bulletins. Check the weather forecast and use this information to decide which spring conditions scenario applies to your trip." **[MW]**

▼ Public Avalanche Forecast

Spring Conditions: Friday



The avalanche danger is variable and can range from Low to High. Travelling early in the day is recommended, as conditions can change rapidly in short periods of time due to daytime warming. Pay careful attention to the integrity of surface crusts formed overnight and rising air temperatures during the day. Dry slab avalanche danger may also exist during spring snow storms.
