Public Avalanche Information
Avalanche Bulletin - Waterton Lakes National Park - Sat Oct 24, 2020

Issued: Sun Oct 18, 2020 10:27 **Valid Until:** further notice

"Winter is beginning in the high country, bringing with it the potential for avalanches. The bulletin will be updated as conditions change, and twice weekly avalanche bulletins will begin December 3." **[GS]**

▼ Public Avalanche Forecast

Early Season Conditions: Sunday

Insufficient observations exist to reliably rate the avalanche danger. Expect shallow snow cover with thinly buried rocks and trees just beneath the surface. Avalanche danger often concentrates in gullies and other deposition areas, where windslabs may bond poorly to a weak underlying base. Deeper snow usually exists at higher elevations.
