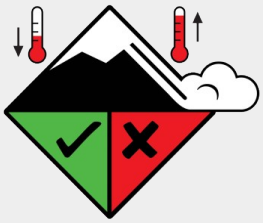
Public Avalanche Information
Avalanche Bulletin - Waterton Lakes National Park - Thu Jun 23, 2022

Issued: Sun May 01, 2022 17:00 **Valid Until:** further notice

"We have concluded our daily avalanche forecasting season. However, avalanche hazards continue well into spring. Avalanche Canada's Spring Conditions page provides guidance for mountain travel over the coming weeks. Have a great spring!" **[LB]**

▼ Public Avalanche Forecast

Spring Conditions: Sunday



The avalanche danger is variable and can range from Low to High. Travelling early in the day is recommended, as conditions can change rapidly in short periods of time due to daytime warming. Pay careful attention to the integrity of surface crusts formed overnight and rising air temperatures during the day. Dry slab avalanche danger may also exist during spring snow storms.
